

## cPRO-software-package-V5.0.2

---

Please use an empty USB stick. Unzip the software package and copy the update file onto the USB drive.

**Cable CAM (7p) – LBUS is required for updating software on cPRO motor and cPRO camin. (Can be used for power supply or update).**

The cPRO\_SW\_PK\_v5.0.2 applies to:

- cPRO hand unit
- cPRO PLUS hand unit
- cPRO ONE hand unit

**Note: The RF communication protocol has been changed from version 5.0 and higher.**

**Therefore, wireless cPRO devices using version 5.0.2 will NOT be compatible with wireless cPRO devices running version 4.0.2 or lower.**

**Note: All cforce MINI motors in the daisy chain need to run SUP 1.3.4 or higher. All cforce PLUS motors in the daisy chain need to run SUP 1.3.0 or higher.**

**Note: The latest release version for the cPRO motor / cPRO camin is 5.0.1.**

### **cPRO / cPRO PLUS / cPRO ONE hand unit:**

Changes between 5.0.1 and 5.0.2

- bugfixes:
  - hand unit reset issue fixed:
    - when mounting / unmounting a camera interface or LCUBE CUB-1
    - when creating / editing an imperial lens file using a single focus value
    - simultaneous FRAM data management optimized
- others:
  - scale visualization improved for lens files with 2 scale values

### **cPRO PLUS hand unit:**

Changes between 5.0.1 and 5.0.2

- bugfixes:
  - hand unit reset issue fixed:
    - advanced focus knob communication improved

### **cPRO motor / cPRO camin:**

- known issues:
  - if connected to LCUBE CUB-1 (SUP 2.0.2), mounting / unmounting a camera interface causes the cPRO motor/camin to reset - does not affect operation
